## 1 [The TRIPPOS filing machine, a front end to a file server](#)

M. F. Richardson, R. M. Needham

 October 1983 **ACM SIGOPS Operating Systems Review, Proceedings of the ninth ACM symposium on Operating systems principles SOSP '83**, Volume 17 Issue 5

**Publisher:** ACM Press

Full text available: [pdf\(771.11 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper discusses an experiment which sets out to improve the performance of a number of single user computers which rely on a general purpose file server for their filing systems. The background is described in detail in reference [1], but for completeness it is necessary to say something about it here. The Cambridge Distributed Computing System consists, at the time of writing, of between 50 and 60 machines of various types, connected by a digital communications ring. On the ...

## 2 [Performance of TCP congestion control with explicit rate feedback](#)

Aditya Karnik, Anurag Kumar

 February 2005 **IEEE/ACM Transactions on Networking (TON)**, Volume 13 Issue 1

**Publisher:** IEEE Press

Full text available: [pdf\(656.34 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We consider a modification of TCP congestion control in which the congestion window is adapted to explicit bottleneck rate feedback; we call this RATCP (Rate Adaptive TCP). Our goal in this paper is to study and compare the performance of RATCP and TCP in various network scenarios with a view to understanding the possibilities and limits of providing better feedback to TCP than just implicit feedback via packet loss. To understand the dynamics of rate feedback and window control, we develop and ...

 1 [Urban research in ethnic, demographic and household-economic structures with](#)

 [small area, micro-databases \(abstract only\)](#)

Harold Benenson, Steven Just

 May 1981 **ACM SIGSOC Bulletin, Proceedings of the joint conference on Easier and more productive use of computer systems. (Part - I): Information processing in the social sciences and humanities - Volume 1981**, Volume 12-13 Issue 4-1

Publisher: ACM Press

 Additional Information: [full citation](#), [abstract](#), [index terms](#)

Computerized U.S. Census data has been most widely used for (1) employment, fertility, demographic and stratification research involving Public Use Sample (PUS) microdata on the national level, and (2) applied research (for planning, administration, marketing, and other applications) with summary (aggregated) data for localized (i.e., block, tract, community, etc.) geographic units. A third, highly productive avenue of research, involving Census PUS micro-data for localized urban units ( ...

**1 BITS based imaging process**

Tim Leamy, Rob Smith, Allan Chen

 November 2006 **Proceedings of the 34th annual ACM SIGUCCS conference on User services SIGUCCS '06**
**Publisher:** ACM Press

**Full text available:** [pdf\(155.52 KB\)](#) **Additional Information:** [full citation](#), [abstract](#), [references](#), [index terms](#)

Many universities use Symantec Ghost to image PCs in their campus computer labs. However, issues related to network traffic, multicasting, and file size create numerous difficulties when transferring image files. Tim Leamy at University of California, Davis (UC Davis) created a system using Microsoft's Background Intelligent Transfer Service (BITS) to transfer Ghost images to PC. Allan Chen and Rob Smith have adapted the system to work at Stanford. The system uses BITS to transfer Symantec Ghost . . .

## Nothing Found

Your search for **+abstract:background +abstract:file +abstract:sub-network** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

### Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +art

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago
